THE STRATEGIC DEVELOP CORP

"INCUBATING" GROUPS OF
PROJECTS/PRODUCTS

INVENTION INCUBATORS

PHASE I - CONSORTIUM OF ASSOCIATES

Individual professionals under one umbrella providing one-stop project development to their clients through a consortium of associates. We each could name the consortium under our respective businesses. We could share one site which would be linked to each of our sites as if it was our own support team.

PHASE II - SPECIALIZED TEAM SERVICES ESTABLISHED

The next step would be to organize ourselves into teams around aspects of development: business plans, technology assessment, prototype design, marketing, licensing, etc. Then each team have its associates and a 'down line' of specialists which we could bring in to fill in a service. The depiction at the top of the page represents the culmination of this phase.

PHASE III - CORPORATE IDENTITY CREATED

At this point we might want to create an corporate identity with partners, associates, and affiliates. We might then begin to 'invest' our time in projects which would have a back end.

PHASE IV - STRATEGIC DEVELOPMENT FUNDS INAUGURATED

Finally we could begin to form our own fund as well as bundle projects into a common interest fund which we would offer privately to qualified buyers. These project funds would be connected to Strategic Development Teams which would help insure their success.
