The RGE Group

Building the Bridge to the Green Economy

*A Blue Sky Vision &
Blue Ocean Mission*

“The Heart and Soul of RGE . . . “

The RGE Mission Statement

RGE Corporate Values

RGE’s Tenfold Purpose

Our Vision of the Future

Our Calling Is -

To productively Launch Public and Private Partnerships that synergistically resolve our waste and energy problems with the same vision and commitment required for the first lunar landing. Through our innovative inspiration and cooperative team building, we will powerfully facilitate the acceleration of hybrid commercialization in tandem with convergent technologies, regional modeling and local partnerships to transmute waste problems into fuel solutions. We are dedicated to deploying the RGE Solution Matrix to catalyze the quantum shift to the new energy platform and cooperatively build the economic engine to transition to the hydrogen economy without delay.

*Building the Right Business, at the Right Time, with
The Right People, In The Right Way, for The Right Reasons!*

**RGE**

The RGE Mission Statement

Our mission at RGE is in our name: RGE stands for *renewable green energy*. The RGE mission is to build the bridge to the green economy, the *renewable green energy* hydrogen economy. The RGE mission is to design, engineer and build that bridge through deployment of its solution matrix for large-scale, waste-to-ethanol production. Ethanol as a safe, clean carrier of hydrogen to fire fuel cells is the missing link needed to move rapidly toward a hydrogen economy.

The bridge to the *green* economy also is a symbol for the creation and economic empowerment of the global alliances needed to bridge the chasm between today's fossil fuel-based economy and tomorrow's clean, renewable energy economy. Our mission at RGE is to build and empower supercreative™ financial, industrial, government and community alliances utilizing best-available technologies to deploy powerful waste-to-energy solutions that will ensure the creation of a commercially sustainable hydrogen economy.

The RGE mission is to incrementally build, finance and strategically manage renewable energy alliances that utilize demonstrated technologies such as plasma conversion and biomass gasification to economically transform waste into ethanol to the great benefit of RGE co-venture partners and investors, as well as communities, regions and nations.

Furthermore, RGE believes that living and practicing daily our foundational values of charity, excellence, honor and integrity (CEHI) and our core disciplines known as vision, blueprint, action and evaluation (VBAE) are fundamental to the success of our mission.

*Building the Right Business, at the Right Time, with
The Right People, In The Right Way, for The Right Reasons!*

RGE Corporate Values

Charity, Excellence, Honor and Integrity (CEHI) are the four cornerstone values that we at RGE work and live by daily. Our corporate culture is different. More than a business, RGE is a mission—a mission that is tethered to and directed by our CEHI values. We at RGE know that we cannot achieve success without the consistent practice of our core values. Therefore, in joy—for it is quite satisfying to practice these values—and in enlightened self-interest, we walk the walk.

We practice *charity* and kindness with all whom we contact, as both qualities are business strengths, not weaknesses. We nurture and grow *excellence* through a synergy of teamwork that accelerates the gaining of mastery in each one's and each team's areas of discipline. We *honor* the gifts and the highest aspirations of all, whether within RGE or outside of our organization. And we rigorously cross-examine all that we say and do at RGE through the lens of *integrity*.

At RGE, we implement our core values through our disciplines protocol known as VBAE—for vision, blueprint, action and evaluation. VBAE is a process that everyone at RGE employs daily. We *envision* and document our goals; we design our overall plans—our *blueprints*—to implement our goals; we lay out our step-by-step *action plans* to reach our goals and we continually *re-evaluate* and fine-tune both our blueprints and our action plans as we navigate through the entire process.

VBAE is our bedrock protocol—our “how we work” set of disciplines—that lends clarity and focus to all that we do. It also is our RGE corporate language, streamlining our communications with each other and facilitating rapid “working-from-the-same-script” attunement among RGE team members.

Deployed in tandem throughout all that we do, CEHI and VBAE are the heart and the soul of the RGE culture.

RGE's Tenfold Purpose

- To Resourcefully Protect Our Planet and 'Our' People from Environmental Harm Utilizing: Cutting-Edge Technology, Conscientious Capital, Regional Modeling and Community Partnerships.
- To Innovatively Blend and Commercialize Convergent Technologies to Immediately Resolve The World's Waste and Energy Problems.
- To Powerfully Fund and Accelerate the Launch of Sustainable Solutions for Renewable Clean Energy, Alternative Fuels, and Transmutation of Waste.
- To Dynamically Develop Green Refineries with the Best Available Technology Modularized for Rapid Deployment.
- To Ingeniously Implement Transmutative Recycling of Wastes into Clean Energy Fuels, effectively resolving the threat of industrial and hazardous wastes.
- To Co-Creatively Resolve Municipal and Regional Waste Problems such as Biomass Waste in Beetle-Decimated forests, Marine Wastes, Tire stockpiles...
- To Imaginatively Coordinate Regional Solutions for the intertwined problems of Energy, Environmental threats, and Economies through Optimizing Supportive Governmental Policies, Planning, and Programs.
- To Build Beneficial Cooperative Partnerships with Local Communities and First Nations (Tribes) to share in the Economic benefits that flow from the resolution of energy and waste problems.
- To Effectively Expand this Launch Platform from Demonstrated Systems of Waste-To-Fuel Conversion to a new energy economy utilizing hydrogen fuel technologies and their engines, combined with hybrid solar/wind generation.
- To Create the Economic Engine that will literally Transport us into a new economic era that increases self-sufficiency, and lowers fossil fuel dependence, increases world stability, reduces scarcity insecurities and founds sustainable new industries.

The Right People, In The Right Way, for The Right Reasons!*

Our Vision of the Future

RGE's Short-term Vision ...

includes rolling out regionally-coordinated, locally-based and publicly-traded Waste Processing Energy/Fuel Production Plants. These standardized waste-handling systems and modularized ethanol-producing mini-refineries will be deployed effectively throughout North America and international demonstration sites. This innovative matrix of solutions to intertwined problems has become the energy platform shifting our economic paradigm.

The Intermediate Vision ...

expands RGE's technological solutions, partnered with local communities and regional coordination to implement the next phase of energy production and transportation. A new era of ethanol-fired fuel cells and their engines interwoven with hybrid solar and wind breakthroughs, continuing to accelerate economic stimulation and environmental harmony.

In the Long Run ...

we envision a more stable environment and a more secure economy with healthier and happier people. We have helped facilitate the convergence of the best technology, with the best commercialization systems and the best trained teams serving:

- Investors and Stockholders
- Strategic Technology Alliances
- Co-venture and Community Partners
- Policy Makers and Regional Agencies
- Recipients Everywhere.
